

Premier Labellers

- Robust construction
- Compact design
- Easy to set-up and use
- Low maintenance
- Cost efficient

P10 / P20
Semi-Automatic

Premier 10 Label Dispenser

Where self-adhesive labels are taken manually from a roll, introduction of the Premier P10 label dispenser has been shown to increase production by two or three fold.

In processes where the operators are wearing protective gloves, the production increases are even more dramatic. In every case, where hygiene is important, the dispenser rewinds the waste roll preventing the accumulation of unsightly rubbish around the workplace.

The P10 is mounted on a rigid 304 stainless steel support stand incorporates a reliable automatic label head designed to be easily set up and used, with simple label feed path and straightforward, front panel mounted operator controls, for speed and label control.

Designed to provide a stable, durable unit, able to withstand the rigours of a packing room for many years.

Premier 20 Semi-Automatic Label Applicator

The Premier P20 semi-automatic system provides quality labelling, consistently, with minimum technical know-how and at a cost within the budget of most projects.

Fabricated from 304 Stainless steel, the P20 incorporates a reliable automatic label head designed to be easily set up and used, with simple label feed path and straightforward, front panel mounted operator controls, for speed and label control.

P20 with round bottle jig attachment

The P20 is ideally suited to low volume production runs, producing new product samples or applications that cannot usually justify the use of fully automatic machinery. The P20 offers the same consistency and accuracy of label placement offered by automatic machinery but at a fraction of the cost. This, combined with two interchangeable labelling attachments make it possible to label virtually every type of product or package with the Premier P20.

P20 with flat sided bottle jig attachment
